

OPEN LETTER:
Protect All International and Immigrant Students and Workers at MIT

July 9 2020

To the MIT Administration and Community,

On July 6, US Immigrations & Customs Enforcement (ICE) [announced that all non-immigrant F-1 and M-1 students cannot take a full online course load in the fall 2020 semester if they are to lawfully remain in the United States](#). If students fail to maintain in-person status, they may face deportation. This ruling not only subjects international students to the possibility of unwarranted and unjust disruption of their education and residence in the United States, it also risks their health and safety in the midst of a global pandemic, forcing universities to consider in-person instruction in order to protect students from deportation.

This announcement [comes on the heels of repeated encroachments by the US administration](#) upon the ability of immigrants and international citizens to participate freely in education, research, and employment in the United States, unduly and unnecessarily preventing them from engaging in the economic, civic, and intellectual life of this country. These rulings have [severely disrupted the lives](#) of many whose families and communities are in the US, while causing many others to live in fear for the safety and stability of the lives they have built here. This includes many of us in the MIT community who are international citizens or immigrants: we who are your colleagues, peers, friends, and loved ones, and for whom MIT is our second home. Some of us are especially impacted: those of us who are raising families here, who are barred from returning to our home countries, who come from countries ridden by war or conflict, who risk facing homophobic, transphobic, racial, or religious persecution if we return home.

In light of these rulings, we call upon the MIT administration and the broader MIT community to do everything it can to protect international and immigrant students and workers at MIT. Every student and worker at risk of deportation must be protected from that possibility, and also protected from unnecessary risk to their health if in-person instruction is required to prevent deportation. To guarantee this protection, we urge the following actions:

1. **Declare MIT [a sanctuary campus](#):** refuse ICE officials entry to all property owned by MIT if they lack a search warrant; ensure that campus police do not cooperate in enforcing immigration law; decline to share any information about immigration status, citizenship, or residential/work addresses with ICE/DHS to the fullest extent possible under the law.
2. **Resist compliance with the July 6 ruling given the on-going legal challenges.** In view of the [Harvard-MIT suit against the ruling](#) given its arbitrary and capricious nature, MIT should resist compliance until legal clarity is obtained, The Institute should simultaneously make plans for minimal compliance to protect affected students, if the ruling is upheld.

3. **Guarantee in-person enrollment to all students at risk of deportation during the Fall 2020 semester.** If the ICE ruling is upheld, all students at risk of deportation should have the option of residing and attending classes on campus without compromising their health. All graduate students at risk should have their research and thesis work considered in-person if necessary, and all labs should plan to accommodate socially-distant in-person meetings, if required for compliance.
4. **Ensure that all students [at high risk for infection or severe illness](#) are exempted from the in-person requirement.** MIT should explore all legal and administrative options to ensure that those at risk from severe illness due to COVID-19 or other pathogens do not have to endanger their health by receiving instruction in-person, regardless of their official status on file.
5. **Prevent disclosure of students' in-person status beyond the minimum required for compliance.** While the ICE ruling [requires that schools certify that F-1 and M-1 students are not taking a fully online course load](#), no further implementation guidance is provided. In view of this, if the ICE ruling is upheld, MIT should do all it can to prevent further disclosure of information related to students' presence or absence from campus.
6. **Provide education and guidance to all affected individuals and supervisors on their rights to record privacy and due process.** All those at risk of deportation, or who are responsible for those at risk of deportation, should become fully aware of their rights with regards to disclosure of immigration or visa status, as well as their rights to refuse entry to enforcement officials without warrants. ([See here for an example of detailed guidance.](#))

We urge the MIT administration and community to adopt these and all other measures necessary to guarantee the safety, continuity, and stability of our lives and education here. We recognize and appreciate that the administration [has already taken strong and swift action](#) against the July 6 ruling, and so are hopeful that MIT will be willing to adopt these stronger measures as well. Nonetheless, [MIT has also demonstrated willingness in the past to cooperate with ICE officials](#) and allow them onto campus for enforcement purposes. In the present legal climate, this cooperation poses an unacceptable risk to all international and immigrant students and workers. As such, we call upon MIT to go further: we must do everything possible to protect international and immigrant members of our community, and to practice the vigilance necessary to guarantee their safety.
